EDUCATION

Poornima University

Bachelor of Technology in Computer Science

2024 – 2028

CGPA: 8.57/10

TECHNICAL SKILLS

Languages: C++, Java, Python, JavaScript, SQL

Frontend: React, Next.js, Vite, Tailwind CSS, React Router, HTML/CSS

Backend: Node.js, Fastify, REST APIs, SSE, Formspree

Database: SQL, PostgreSQL

Cloud & Blockchain: OCI, Solidity, Hardhat, Monad

Developer Tools: Git, GitHub, Vercel, GA4, Vercel Analytics

Core CS: DSA, OOP, DBMS, Operating Systems

PROJECTS

DevRel Studios | *React 19, Vite, Tailwind CSS, React Router, GSAP, Lenis, Formspree*

Live | GitHub

- Built a production-ready SaaS agency platform featuring five responsive pages for client acquisition, service showcase and lead generation.
- Developed reusable React components with React Router, Tailwind CSS and Vite, improving maintainability and scalability.
- Implemented GSAP ScrollTrigger animations, Lenis smooth scrolling, interactive timelines and portfolio filtering to enhance user experience.
- Integrated Formspree, Google Analytics 4 and Vercel Analytics for contact automation, visitor tracking and production monitoring.
- Optimized SEO, accessibility and responsive design before deploying the application on Vercel.

Oracle Before Signing (OBS) | *Next.js, TypeScript, Node.js, Fastify, Solidity, Hardhat, Monad*

Live | GitHub

- Built a blockchain transaction simulation platform that evaluates smart contract interactions before wallet signature to detect malicious approvals.
- Developed deterministic Hardhat fork simulations to analyze token transfers, balance changes and approval risks before execution.
- Designed a modular backend architecture using Fastify with real-time Server-Sent Events (SSE) for transaction analysis and verdict streaming.
- Integrated Monad smart contracts and implemented an x402 pay-per-verdict workflow for secure blockchain transaction analysis.
- Separated simulation, judgment and execution modules, improving maintainability and simplifying future blockchain integrations.

LEADERSHIP

Technical Lead

2025 – Present

GDG On Campus, Poornima University

- Lead technical planning and execution of hackathons, workshops and developer events for 200+ students.
- Mentor students in Git, GitHub, React, full-stack development and software engineering best practices.

EXPERIENCE

Digital Marketing Intern

Mar 2025 – Apr 2025

Cannibals Media

- Conducted competitor research, campaign analysis and market research to support data-driven digital marketing strategies.

HACKATHONS

SCPC–Henkel DX National Supply Chain Hackathon

- Semifinalist for building an AI-powered supply chain optimization solution in a national-level hackathon.

Smart India Hackathon (SIH) 2025

- Developed RailDrishti AI, an intelligent railway monitoring and optimization platform.

Bharat for AI Hackathon

- Built an AI-powered solution in a collaborative multidisciplinary development team.

CERTIFICATIONS

Oracle Cloud Infrastructure (OCI) Certified Developer Professional (2025)

Google Career Launchpad Cybersecurity
